User name will be employee ID. Each User shall be provided with his credentials. User will be provided the provision to change password.

Error generation when password and username does not match

Error generation when username not in database

Home Page

MAIN MENU BAR / HEADER

Left Corner: Software Logo

Top Bar: Shall display notification status. This will display as follows:

- a) Total number of patients registered today.
- b) Total Number of patients who have been diagnosed and reports completed.

Top Right Corner: User Log in Details

MAIN MENU BUTTONS: Features in Brief

Doctor Management: This button will take user to view list of all doctors in the system, View Doctors right, Add / Deactivate Doctors, Edit Rights, Reset Password and many more.

Staff Management: This Button will allow user to view list of all employees together with personal details other than Doctor's, Check the Rights/Duties Assigned, Edit Rights, Add new employees and deactivate.

Prepared for Dr. Saab

Patient Management: This button will allow user to search for a patient present in the database of the software, View past history, Edit present reports, Assign Old report data to new, Update Patient Details, Lock Reports.

Manual Reports: This will take user to allow generating manual reports of different categories.

Patient Status: It allows user to view the status of a patient and also get past historical data thus making easy for Doctor to get details without finding through each dept.

Event Log: It will provide an insight of the key operations that are taking place thus providing information useful for the purpose of data analysis.

LEFT SIDE BAR

Other useful features for ensuring smooth operations on daily basis and for the convenience of Patients - Todays List can be projected separately in the Main Hall.
